Application No.: 10/567,852 Docket No.: 9988.292.00

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1-4. (Canceled)

5. (Currently Amended) A controlling method of a drum type washing machine, comprising:

performing washing and rinsing operations in accordance with a start command inputted by a user and a procedure selected by the user;

performing a laundry quantity measurement operation after end of the washing and rinsing operations;

selectively performing a preliminary spin drying operation <u>only</u> when the measured laundry quantity is <u>the same as or bigger</u> not smaller than a reference quantity value;

performing a main spin drying operation; and terminating the spin drying process after the main spin drying operation.

- 6. (Original) The controlling method according to claim 5, wherein the laundry quantity is the volume of laundry loaded in a drum and/or the weight of the laundry after the rinsing operation.
 - 7. (Canceled)
- 8. (Currently Amended) The controlling method according to claim 5, further comprising:

performing an eccentricity measurement operation after the laundry quantity measurement operation;

performing a determining operation to determine whether the measured eccentricity is smaller than a reference eccentricity value,[[; and]]

Application No.: 10/567,852 Docket No.: 9988.292.00

wherein the eccentricity measurement operation and the determining operation are repeated until the measured eccentricity becomes smaller than the reference eccentricity value.

9. (Canceled)

- 10. (Currently Amended) The controlling method according to claim <u>8</u> [[5]], wherein the preliminary spin drying operation is [[not]] performed when <u>the measured eccentricity is smaller than the reference eccentricity value.</u> the measured laundry quantity is smaller than the reference quantity value.
- 11. (Previously Presented) The controlling method according to claim 8, wherein the eccentricity measurement operation includes stopping a drum and accelerating the drum again.

12. (Canceled)

- 13. (Currently Amended) The controlling method according to claim $\underline{8}$ [[5]], wherein the preliminary spin drying operation is carried out at least one time and $\underline{\text{the}}$ [[a]] main spin drying operation is carried out after the preliminary spin drying operation.
- 14. (Previously Presented) The controlling method according to claim 5, wherein the preliminary spin drying operation is carried out one or more times under an automatic control of a microcomputer based on the measured laundry quantity.

15-17. (Canceled)
